Come along and attend an advanced class on VersaWorks RIP Printing software.

This full day course provides a detailed lesson on how to use the standard and advanced features of VersaWorks. We cover advanced production tips, getting the best results, managing and tweaking profiles. We will also cover in detail the new features in the latest version of VersaWorks.

Delivered in a seminar style with physical demonstrations.

OVERVIEW:

MAXIMISING FLEXI: This seminar focuses on digital printing, topics will include utilising DesignCentral, maximising workflow efficiency, and getting the best colour possible. Since the launch of this seminar in the USA in May and June the seminars have proven invaluable to Flexi owners who have taken the course.

You will learn about;

- overlooked Flexi features
- all the new updates for version 8
- we will show you how to optimise your digital print workflow for speed and productivity
- you'll also learn advanced vinyl and contour cutting techniques
- understand how to manage colour from start to finish
- finally, you'll be able to match monitor to print and match customer colours and vinyl specs

If you have some Flexi experience, but need to make more out of all of its powerful features, this seminar is perfect for you. "Maximising Flexi" is an intermediate to advanced level program designed to transform attendees into Flexi power users.

You will learn about overlooked Flexi features and the new updates for version 8. We will show you how to optimise your digital print workflow for speed and productivity. You'll also learn advanced vinyl and contour cutting techniques and understand how to manage colour from start to finish.

Finally, you'll be able to match monitor to print and match customer colours and vinyl specs. We will show you how to apply colour profiles, whether using built-in and third-party media profiles or creating your own custom profiles with Colour Profiler.
