

The Complete HP Latex Printing Solution

The HP Designjet L25500 can print on all your favourite eco-solvent media substrates

Celmac supply a wide range of latex printable media. Products from Mactac, 3M, HP, Avery, Kodak, Orafol and many others are certified by HP for compatibility. Products including banner, paper, self adhesive vinyl, wallpaper, canvas, and polypropylene can be printed on the HP Designjet L25500 Printer.

For more information on media compatibility, please visit www.hp.com/Go/L25500/Solutions

Application made easy

From trade show signage, exhibition graphics, point-of-purchase displays, fabric displays and wall murals inside to banners, light boxes, vehicle graphics, billboards, and building wraps outside, HP Latex Ink printing solutions will assist you to win new business.

HP Designjet L25500 Printer

LATEX PRINTING made easy by Celmac

HP Designjet L25500 Printer Series

Offer outdoor and indoor application versatility with print-quality and display permanence comparable to low-solvent printers. Reduce the impact of printing on the environment and attract the attention of environmentally conscious customers.

1. User-replaceable printheads
2. Comes with take-up reel included
3. Completely dry prints right out of the printer
4. Optical Media Advance Sensor and Optical Drop Detector
5. Speed up to 22.8 m² /hr
6. Embedded Web server
7. Low service and maintenance costs

Which RIP is right for your business?

The success of printing with the new L25500 is to a large degree with your choice of RIP. The printer is driven by the RIP alone and therefore the ease of Profiling, Calibration, Color Management, Workflow and Product Print Selection is a key consideration in making the right choice of RIP for your business.

The HP Designjet L25500 Printer Certification Program. This ensures that users can depend on the compatibility and integration of the Certified RIP and Workflow solutions provided by the leading suppliers with the corresponding hardware systems from HP. The coveted Certification is awarded exclusively to those products that have been rigorously tested on the basis of the criteria stipulated by HP and that have achieved the required test results.

Celmac has two RIP solutions available, both being Certified by HP, ONYX and ColorGATE. Today, ColorGATE is the only RIP to be awarded a perfect score by HP.

Certified for HP Designjet L25500	Printing Performance	Calibration	HP Media Support	Media flexibility	HP Professional PANTONE Emulation	Printer Reporting	Job management
ONYX (V7.3.2 build 29)	★★	★★★★	(9) ★★★★	★★★★	★★★★	★★★★	★★★★
ColorGATE (ProductionServer 5.40 build 2797)	★★★★	★★★★	(9) ★★★★	★★★★	★★★★	★★★★	★★★★

HP Latex Inks

Water-based HP Latex Inks need no special ventilation. They also require no hazard warning labels and are non-flammable and non-combustible, all of which may help to reduce storage, handling, and waste disposal challenges. Furthermore, the inks contain no Hazardous Air Pollutants (HAPs). All of this can help to create a better working environment.

The Productionserver 6 from ColorGATE presents 2 editions, having been customized for use with the new Latex HP printing Systems.

- **PS 6 HP L25500 Best-Price Edition**
Includes Productionserver 6 PRO with 1 queue, 1 RIP process and 1 Printer Driver.
- **PS 6 HP L25500 Producer Edition**
Is additionally equipped with another RIP process for optimal capacity utilization. Also included is an integrated Profiling solution and Ink Saver technology.

New ink saver module from Colorgate..

"Save on your bottom line"

Production Server 6 features Ink Saver Technology - the new Ink Saver Technology exclusive to ColorGATE that uses GCR-optimized device link profiling to reduce ink costs by up to 30%. Sophisticated algorithms for the calculation of the color separation guarantee a substantial reduction in the amount of ink, particularly for vividly colored processes and needless to say, without any loss in quality, even under the most intense scrutiny.

CCM, Cost Calculation Module makes it possible to precisely determine how high the savings will be before you print, right down to the last picoliter.

ColorGATE: Voted 'BEST RIP SOLUTION FOR WIDE FORMAT PRINTING' by the European Digital Press Association.

Installation, Service & Support

When you purchase a HP Designjet L25500 Latex printer from Celmac our fully trained in house technicians install and train you on every aspect enabling you to start production. We ensure you are competent in using and maintaining your latex printer, capable of operating your RIP and printing on the media of your choice. After that the service of your HP Designjet L25500 latex printer is taken over by HP technicians.

In addition to the standard 1 year HP Factory Warranty, options are available to extend the warranty on your HP Designjet L25500 latex printer. Please see below.
